SUMMARY

Sitecore Certified AI CMS Developer with strong expertise in Sitecore XP, XM, XM Cloud, SXA, Sitecore MVC, .NET, and ASP.NET. Skilled in developing scalable enterprise web applications, creating customized CMS solutions, and delivering high-performance digital experiences. Proven ability to build maintainable applications, optimize platform functionality, and collaborate effectively within Agile teams to achieve business objectives.

PROFESSIONAL EXPERIENCE

Engineer

HTC Global Services

October 2025 – Present
Hyderabad

- Developed reusable, data-driven Sitecore MVC components using Sitecore MVC architecture and Razor views, ensuring components remained agnostic to page structure and reusable across multiple sites.
- Created and managed Sitecore templates, standard values, branch templates, and multilingual data source items to support complex multisite solutions.
- Designed scalable components with a single codebase capable of supporting different branding requirements and data sources across multiple site nodes in the content tree.
- Utilized rendering parameters to enable content authors to customize component look and feel without requiring additional development effort.
- Managed deployment and content synchronization across environments using packages, TDS, and Unicorn, while troubleshooting issues through Sitecore logs and debugging component failures.
- Integrated HTML5, CSS3, Bootstrap, JavaScript, and jQuery with Sitecore components and collaborated with UX and DevOps teams to deliver scalable, high-performance solutions.

Sitecore Developer

Erebor tech

August 2022 –
September 2025
Hyderabad

- Developed reusable Sitecore XP/XM MVC components and implemented caching to improve application responsiveness.
- Delivered personalized user experiences by integrating Sitecore data models with dynamic content delivery.
- Designed and integrated Sitecore content structures and data templates, enabling scalable and maintainable content delivery across multiple websites.
- Designed and implemented GraphQL APIs for Headless CMS integrations, improving front-end content access in Sitecore XMC.
- Configured and optimized Sitecore search solutions using Solr, improving content discoverability, search relevance, and retrieval performance.
- Automated deployment and configuration using CI/CD, reducing manual effort and errors.
- Refactored and debugged legacy code, improving maintainability and reducing recurring issues.
- Used Glass.Mapper to simplify Sitecore data access with automatic field-to-model mapping.

EDUCATION

Bachelor of Degree in Computer Science

Andhra University

2017-2020

SKILLS

- Sitecore: SitecoreAI, XMCloud(XMC), SXA, XP, XM, Headless CMS, Sitecore MVC, Sitecore PowerShell Extensions
- Backend: C#, ASP.NET MVC, ASP.NET Core, Node.js, LINQ
- Tools & Methodologies: Azure Portal, CI/CD, Agile Development, Visual Studio, Visual Studio Code, Postman
- Frontend: HTML5, CSS3, JavaScript, jQuery, React.js
- Databases & APIs: MS SQL Server, Cosmos DB, Solr, GraphQL, REST APIs

CERTIFICATES

SitecoreAI CMS Developer

Issued: May 2026

PROJECTS

Mylan

A digital solution for better healthcare accessibility and management

- Developed Sitecore MVC components to migrate non-Sitecore country websites into the existing Sitecore platform.
- Designed reusable components based on country-specific client requirements.
- Created Sitecore templates, renderings, and content structures for regional websites.
- Integrated country-specific functionality while maintaining the existing Sitecore architecture.
- Collaborated with clients and QA teams to ensure successful component development and integration.
- Supported testing, defect fixing, content authoring, and multi-environment deployments.

Rooted

Backend API services powering real-time data delivery for a quick-commerce mobile application

- Developed and maintained a Node.js backend API with modular architecture, ensuring scalability and long-term maintainability.
- Integrated Google Maps APIs to deliver geolocation data, including distance and estimated travel times, for optimized logistics.
- Improved backend responsiveness using asynchronous functions, non-blocking I/O, and effective caching techniques.
- Monitored, reviewed, and refactored code regularly to ensure stability, performance, and adherence to best practices. Participate in architecture and technical design discussions with architects.

Brother USA

Sitecore based e-commerce platform for delivering scalable and personalized digital shopping experiences

- Built and customized Sitecore XM components, templates, and layouts using Sitecore SXA and MVC and scriban. Improved scalability and authoring efficiency.
- Collaborated on Sitecore XM deployments and environment management across Dev, QA, and UAT.
- Ensured reliable releases and seamless content publishing. Automated deployments and configurations using PowerShell, Sitecore CLI, and serialization tools.
- Optimized XM content architecture, workflows, and publishing. Improved performance, caching, and overall maintainability.

MNG Health

Event management system for delivering healthcare programs and experiences to registered users

- Collaborated with cross-functional teams to gather requirements and translate them into technical specifications.
- Designed and implemented data templates, components, and fully functional websites within Sitecore.
- Developed clean, scalable .NET code to maintain performance, reliability, and long-term sustainability using Sitecore Helix principles.
- Identified and resolved bugs proactively while refactoring code to align with evolving best practices.
- Implementing the custom pipelines resolvers and event handlers to the sitecore.
- Optimized search performance and ensured synchronization between Sitecore content and Solr indexes
